(57) Abstract :
ABSTRACT METHOD FOR PROVIDING SMART HANDHELD ELECTRONIC DEVICES FOR COLLABORATION AND MANAGEMENT OF PERSONAL ELECTRONIC DATA
The present invention provides an approach for providing smart handheld electronic devices for collaboration and management of personal electronic data. The present invention provides a method and system comprising a processor and a memory within the vehicle electronic device a physical vehicle data bus connector, wherein the physical vehicle data bus connector is configured to be physically connected to a vehicle data bus selected from: a protocol vehicle data bus, a protocol vehicle data bus, or an protocol vehicle data bus, a vehicle data acquisition module, stored on the memory within the vehicle electronic device, that, when executed by the processor within the vehicle electronic device, causes the processor to receive vehicle data from the vehicle data bus.
