PROBLEM STATEMENTS

Software-Related

- Real-time crop monitoring & advisory for quick, informed decisions
- AI-based weather-soil-crop advisory systems for timely, data-driven farming
- Digital rental/service platforms for farm machinery access
- Low-cost IoT water-quality monitoring with mobile dashboards
- Cloud-based livestock health app with RFID for disease tracking
- AI-driven tools for real-time millet crop health, weather insights & timely advisory
- Digital platforms to connect millet farmers with buyers for fair pricing

Hardware-Related

- AI-enabled drone-mounted imaging systems for early crop stress detection
- Affordable mini-mechanization with IoT-enabled tools for small farmers
- Automated sensor-based drip irrigation for optimal water use
- Portable cold storage & smart silos for improved post-harvest management
- AI + IoT systems for automated food processing and quality monitoring
- Smart auto-feeders with sensors to reduce feed loss & pollution
- Renewable-energy IoT aeration systems for oxygen management in aquaculture
- Solar-based cold storage for fish handling and longer shelf life
- Wearable biosensors for early livestock health alerts
- IoT-enabled automation and quality testing in milk processing units
- Enhanced cold chain and transport solutions for better dairy shelf life
- Low-cost millet dehushing, grading & storage solutions with minimal losses
- Nutritious, affordable millet-based food products with improved shelf life

REWARDS

- Cash Prizes worth **Rs. 1 Lakh**
- Ignition Grant up to **Rs. 10 Lakhs** (If Selected for Cohort-3 of RJ E-Nest)
- Mentoring, Pre-incubation / Incubation support by **aIDEA, ICAR-NAARM**
- Close interaction with Agri Scientists, Farmers, Innovators and Startups
- Certificate of Appreciation to all the Participants
